

WEBSITE MODERNIZATION · REPORT & PROPOSAL

A website that works for you — and that you own.

A competitive review of the best garage door company websites in the U.S., and a plan to bring Ryan Garage Door up to that standard.

1 • Executive summary

We studied how the most successful garage door companies in the country build their websites, and we audited yours. The gap is not about looks — it is about **what the website actually does**.

Today, a typical local business pays a monthly bill just to keep a website online — a site that, in practice, does little more than sit there. That is the model we want to end for you. Our proposal is simple:

- **You pay once** for a fast, modern website that you **own outright**.
- **It runs at roughly \$0 / month** — only the cost of your domain name (about \$15 a year).
- **It does real work from day one**: captures leads, ranks in local Google searches, shows off your reviews, and lets customers reach you instantly.
- **It can grow when you want it to**. Powerful add-ons — online job booking, 24/7 answering, automated review collection — are available as optional tools. You only ever pay monthly for a feature that actively brings you work, never for "keeping the lights on."

The one-line version

Stop renting a website that does nothing. Own one that earns — for a single up-front price, then near-zero monthly cost.

2 • What we saw

2.1 — Your current website

Your site is built on WordPress with the Divi theme. It presents your services well and reads professionally, but functionally it offers only a basic contact form. It is missing every feature that today's leading garage door sites use to convert visitors into booked jobs:

- No online scheduling — visitors cannot book a visit; they must call and hope to get through.
- No instant quote or estimate request beyond a plain form.
- No live chat or after-hours capture.
- No door design / visualizer tool.
- Your reviews are essentially invisible — only a single testimonial appears on the whole site.

2.2 — Your hidden advantage

This is the most important thing we found. Ryan Garage Door has earned an **outstanding reputation that the website is throwing away**:

265+ verified reviews across Google, Thumbtack, Angi & Nextdoor	115 five-star reviews on your Google listing alone	5.0★ everywhere — not one review below five stars	1 shown on your website today
---	---	--	--

You have done the hard part — and done it exceptionally well: **115 five-star reviews on Google**, 123 more on Thumbtack, plus Angi, HomeAdvisor and Nextdoor — every single one five stars. The reviews are there and they are spotless; your website just is not using them. **Putting this proof front and center across your new site is the single biggest, cheapest win available to you**, and it is built into our base proposal.

In their words — straight from your Google reviews

"Ryan replaced my entire garage door. I called him on a Wednesday and he came on a Saturday and got it fixed right away (though it is winter time). He is fast, very efficient, very professional... I love my new garage."

— Sherwin Jose Cuya · Google

"Ryan was fast, honest and went above and beyond! My garage door broke and the weather was horrible. Ryan worked in 2 degree temp to get it done and was very kind and honest! Would use again!"

— Kendra Green · Google

"Called this guy in on a house call. He came the same day and did this fantastic job. Will definitely be my guy for anything garage door related. 10/10 easily."

— Bryan Kigongo · Google

One housekeeping item: your Angi profile currently signals no emergency service, while your site advertises 24/7 availability. We recommend aligning your Google Business Profile and listings with your true hours so customers searching at 2 a.m. find you.

2.3 — What the best companies do

Across the strongest national and regional garage door websites (Precision, A1, Overhead Door, and top independents), the same winning features appear again and again:

Winning feature	What it does
Real-time online booking	A date and time-window picker that books a visit instantly — not a "we'll call you back" form.
Reviews front and center	Live star ratings and customer quotes above the fold, plus trust badges (Google, BBB, licensed & insured).
Instant quote request	A short, guided "tell us about your door" flow that captures a qualified lead.
Door design visualizer	Lets a homeowner preview new doors on a photo of their own house before buying.
24/7 capture	Live chat or after-hours answering so an emergency call is never lost to a competitor.
Local SEO architecture	A dedicated page for every town served, so the business ranks for "garage door repair near me" everywhere.
Maintenance membership	A simple annual plan that turns one-time repairs into repeat, loyal customers.

Why it matters: across home-service businesses, roughly 78% of customers hire whoever responds first, and a large share of calls come after hours. A site that captures and responds instantly wins the job.

3 • Our approach — a site you own

We treat your website as two clearly separate things, so you always know exactly what you are paying for.

The website itself	Optional tools on top
One-time build. ~\$0 / month. A fast, modern, mobile-first site that you own outright. Includes everything in the list below. This replaces the "monthly fee for nothing" model entirely.	Pay-as-you-grow. Features that actively do work — book jobs, answer calls 24/7, collect reviews automatically. These run on specialist services with their own monthly fees. You add them only if and when you want them.

Included in the base build — all at \$0 / month

Feature	What you get	Run cost
Modern, fast, mobile-first site	Built to load in under 2 seconds and look sharp on every phone	\$0
You edit it yourself	Simple visual editing — change text, photos, prices without a developer	\$0
Click-to-call + sticky mobile bar	One tap to call you, always visible on phones	\$0
Contact & quote-request forms	Leads emailed straight to you, with spam filtering	\$0
Appointment-request form	Customers send their preferred date/time; you confirm	\$0
Reviews showcase	Your 265+ five-star reviews (115 from Google) displayed, with a "Leave us a Google review" button	\$0
Local SEO + ~18 town pages	A page for every community you serve, with Google-friendly structured data	\$0
Door design visualizer	A button linking to a free manufacturer tool to preview doors	\$0
Coupons & 24/7 emergency banner	Your senior / military / new-customer offers, presented to convert	\$0
Blog, FAQ & project gallery	Carried over and improved from your current site	\$0

Hosting is on a free, enterprise-grade global network with automatic security (HTTPS). Your only recurring cost is the domain name, about \$15 per year.

4 • Project cost

The headline: **one up-front price, then essentially nothing each month.**

Item	When	Cost
Website build & launch — you own it outright	One time	\$600
Hosting & running the site	Monthly	\$0
Domain name	~\$15 / year	≈ \$1.25 / mo
Total monthly to run your website	Monthly	≈ \$0

You make your money back in the first year

Right now you pay **\$50 a month — \$600 every year** — just to keep a site online that mostly sits idle. Our build is **\$600 once**: exactly one year of what you pay today. So by the end of year one you have already broken even — and from year two onward you keep roughly **\$600 in your pocket every single year**, while owning a site that does far more than the old one ever did.

Optional upgrades — only if you want them

Each of these is a real working tool that earns its keep. They run on specialist platforms billed monthly. Add any, all, or none.

Upgrade	What it adds that the free version cannot	Typical monthly
Real-time online booking + dispatch	Live calendar with time slots, automatic job tickets, "on my way" text messages, scheduling that runs your day	\$49–\$149
24/7 answering	An AI or live service that catches after-hours emergency calls you would otherwise miss	\$49–\$149
AI website chat	Instant chat that answers questions and captures leads around the clock	~\$99
Automated review collection	Automatically texts every customer after a job to build your Google reviews on autopilot	\$75–\$125
Free live chat (alternative)	A simple chat box you answer yourself	\$0
"Never goes offline" hosting	Guaranteed uptime even on big traffic spikes (optional safety upgrade)	~\$9

The principle: you never pay a monthly fee for "nothing." Every recurring cost above maps directly to a tool that books a job, answers a call, or earns a review. The math is favorable — for example, a single extra job a month easily covers a 24/7 answering service.

5 • Value-add services at a glance

Every feature in plain language — what it does for your business, and how each maps to the costs in Section 4. The items marked **Included** come with your one-time build at no monthly cost; the rest are optional services you can switch on whenever you want.

Optional value-add services

These are real working tools that earn their keep. They run on specialist platforms billed monthly — add any, all, or none.

Service	What it does & why it is worth it	Cost (Section 4)
Real-time online booking + dispatch	Customers pick a time and book themselves around the clock; the job drops straight onto your schedule with automatic "on my way" texts. Since roughly 78% of customers hire whoever responds first, this captures them the moment they decide.	\$49–\$149 / mo
Reserve with Google	A "Book" button appears right inside your Google listing and Maps, so customers can book you at the exact moment they find you in search.	Included once booking is on
24/7 answering (AI or live)	Answers calls after hours and while you are on a job — the emergency calls you would otherwise lose to a competitor. A single captured job covers months of the service.	\$49–\$149 / mo
AI website chat	Instant chat that answers questions and books leads around the clock, converting the visitors who will not pick up the phone.	~\$99 / mo
Automated review collection	Automatically texts every customer after a job inviting a Google review — turning your already-spotless service into a steady stream of new five-star reviews on autopilot.	\$75–\$125 / mo
"Never goes offline" hosting	Guaranteed uptime even on big traffic spikes — an optional safety upgrade so the site never goes dark.	~\$9 / mo

Value-adds already included in your build — \$0 / month

Feature	What it does & why it is worth it	Cost
Reviews showcase	Your 265+ five-star reviews (115 from Google) displayed across the site, with a "Leave us a Google review" button — your single biggest trust asset, finally front and center.	Included

Website live chat (you answer)	The same lead-capturing chat box, answered by you or your team — full capture with no monthly fee, if you prefer to handle it yourself.	Included
Door design visualizer	A button that lets a homeowner preview new doors on a photo of their own house — helping close new-door sales without a sales visit.	Included
Click-to-call + sticky mobile bar	A one-tap call button that stays visible on every phone screen — the fastest possible path from visitor to phone call.	Included
Quote & contact forms	Quote requests emailed straight to you, spam-filtered, so no lead slips through.	Included
Local-search setup	Behind-the-scenes Google structured data plus a dedicated page for every town you serve, so you show up for "garage door repair near me" across your whole area.	Included

Monthly figures match Section 4 exactly and are set and billed by the specialist providers, not by us. The site is built so any optional service can be switched on instantly whenever you are ready.

6 • Recommended next steps

1. **Approve the base build.** We design and launch your new site — owned by you, ~\$0/month to run.
2. **Claim and fix your Google listing.** Confirm your 24/7 hours and start collecting Google reviews — your biggest quick win.
3. **Pick your booking platform** (Housecall Pro or Jobber) if you want real-time online scheduling. We can trial both.
4. **Decide on door brand.** If you carry a brand like Clopay, we link its free visualizer; otherwise we use the universal option.
5. **Layer in upgrades over time.** Add 24/7 answering, AI chat, or automated reviews whenever you are ready — the site is built to accept them instantly.

What you get with Signals | Kernels

A website you own, that loads fast, ranks locally, shows off your spotless reputation, and never charges you monthly for sitting still. We build it once; it works for you every day after.
